

Clean Slate Anti-Graffiti System

Keep your property clean and protected

At Auckland Commercial Coatings, we're proud to be accredited applicators of the Cohe Clean Slate Anti-Graffiti System.

Formulated and manufactured in New Zealand, Clean Slate creates a tough, clear, protective barrier that makes graffiti removal simple, fast and cost-effective, without damaging the underlying surface.

Together with Cohe, we provide property owners with long-lasting protection and peace of mind.

Why we choose Clean Slate

Cost effective protection

Reduces the need for frequent repainting and maintenance.

Prevents damage to substrates, lowering long-term repair costs.

Excellent gloss retention

Non-yellowing, high-gloss finish that dries clear.

Preserves the natural look of concrete, block, tilt-slab, brick, timber, or metal.

Durable & easy to maintain

Graffiti can be removed up to 48 hours later using only a citrus cleaner and a damp rag.

Resistant to UV, weathering, and wear in medium-to-heavy duty environments.

Long-lasting barrier for both commercial and industrial applications.

Systems backed by partnership

As accredited applicators of Cohe systems, we combine our expertise with Clean Slate's proven technology to deliver graffiti-resistant finishes that last.

From schools and public spaces to commercial properties and transport hubs, we help you protect your assets and maintain a clean and professional appearance.

Application highlights

1. Water-based polyurethane system with low VOCs.
2. Touch dry: 3 hours | Recoat: 4–24 hours | Full cure: 14 days.
3. Available in 4L and 10L packs.
4. Easy water clean-up; non-toxic and non-flammable.
5. Works on: Concrete & blockwork, tilt-slab & brick, timber and metal cladding & structures.
