

Liquid Rubber Waterproof Sealant

Flexible, protection where you need it most

This multi-purpose sealant is trusted across New Zealand to waterproof and protect a wide range of surfaces - from roofs and gutters to balconies, foundations and even motorhomes.

Mainly applied with a brush or roller, it dries to form a tough, flexible, and seamless rubber membrane that keeps water out and protection in.

Together with Cohe, we provide solutions that are environmentally safe, reliable, and built to last.

Why we choose Liquid Rubber Waterproof Sealant

Waterproofing & corrosion protection

Forms a seamless, fully bonded membrane.

Excellent adhesion to concrete, masonry, timber, steel, torch on and butanol and more.

Resistant to ponding water, salt, and thermal cycling.

Safe & easy to use

Non-toxic, water-based, VOC-free formulation.

Low odour and easy clean-up with water.

Safer alternative to solvent-based or hot-applied waterproofing.

Flexible & durable

Withstands movement, vibration, and structural stresses without cracking.

Elongation of >950% for exceptional flexibility.

Resistant to biological deterioration and harmful chemicals.

Systems backed by partnership

As accredited applicators of Cohé systems, we deliver more than just a coating - **we deliver peace of mind.**

Whether you're protecting a home, a commercial site, or specialist structures, we combine our hands-on expertise with Cohé's proven sealant technology to ensure long-term protection.

Typical applications

1. Roofs & internal gutters
2. Skylights, vents & penetrations
3. Foundations & retaining walls
4. Balconies & decks
5. Shipping containers & steel structures
6. Concrete structures
7. Ponds, water features & water tanks
8. Motorhomes, caravans & horse trucks
